TITLE : REPRODUCTION SYSTEM OF AV
INFORMATION AND REPRODUCTION
METHOD APPLIED TO THE SYSTEM

ABSTRACT : PROBLEM TO BE SOLVED: To provide the reproduction system that easily obtains not only reproduced conventional title information but also information relating to prescribed stream information through the use of a resource of a computer network by a simple operation in the system that reproduces AV information from a storage medium such as a digital video disk DVD.

SOLUTION: In the system having a function of reproducing title information recorded on a DVD 40 and displaying the information on a screen of a display section 10, when a Web mark displayed on the screen is clicked, a CPU 1 links with a Web server on the Internet via a MODEM 6 to access the Web page relating to stream information on the screen. In this case, the relating Web page is selection information adaptive to parental information being attribute information set in the system.
